

Michael Espin

CSIT-341-01

Dr. Syed Ali Haider

7/29/21

Sprint 1:

Write a class Car and write a CarRental class that stores the information about all the cars.

Write accessor and mutator functions for all classes (where required).

Write a empty function get_cars_by_capacity.

Sprint 2:

Complete get_cars_by_capacity function

Write the driver to test class and get_cars_by_capacity function

Run test case and fix error if exists
